DOCKS

Il cemento è una materia primitiva ed essenziale, che Abk ha interpretato con il proprio stile, arricchendo il prodotto attraverso una profonda ricerca per la proposta di soluzioni decorative totalmente originali.

Cement is a primitive and essential matter, reinterpreted by Abk with its own style and enriched through a deep research to offer brand new and original decorative solutions.

DOCKS

Colore e materia sono le coordinate progettuali di DOCKS, declinate in lastre di gres porcellanato ad impasto colorato, definite dal movimento della struttura, dal design della texture e dalla tattilità particolare, estremamente morbida. Posate a terra o a parete, compongono una superficie di segno contemporaneo che trae ispirazione dai moderni cementi utilizzati in architettura: le stanze acquistano forma e armonia dove sono i materiali ad essere i protagonisti.

La gamma cromatica è composta da Silver, Grey, Black, White, Bone e Warm, sei toni neutri complementari ed estremamente versatili, disponibili in due finiture diverse di superficie. La versione naturale, che assorbe la luce, è morbida al tatto pur mantenendo buone proprietà antiscivolo; la superficie patinata invece, grazie alla sua particolare riflettanza alla luce, è capace di donare un effetto vissuto intenso e suggestivo.

Docks è una collezione ampia e articolata che trae origine da lastre di 60x60 e di 40x80, che moltiplicandosi per i numerosi formati ricavati, per le diverse finiture di bordi e di superficie mette a disposizione ben 16 differenti tipologie fra pavimenti e rivestimenti, corredate da decorazioni e pezzi speciali.

Proprio i decori, come ci si aspetta da Abk, rappresentano uno degli elementi distintivi di questa collezione: numerosi e originali, sia per pavimento che per rivestimento, valorizzano gli ambienti con dinamicità e raffinatezza, declinandosi in tantissime soluzioni nuove e creative e amplificano la versatilità della collezione.

Color and matter are DOCKS' project coordinates, displayed in coloured body porcelain tiles, defined by structure's movements, texture's design and the particular tactility, extremely soft.

Both floor and wall coating, the tiles compose a contemporary signed surface inspired by modern architecture cements: settings acquire harmony and shape, where materials play the leading role.

The chromatic range is composed by six neutral and complementary tones, extremely versatile and disposable in two different surface's finishes. The natural one, light absorbing, is soft to the touch even maintaining good anti-slip properties; the patinated surface instead, thanks to its particular light reflection feature, is able to give an intense and suggestive aged effect.

Docks is a wide and articulate collection that originates from 60x60 and 40x80 slabs, that multiplied for the large number of obtainable formats and for the several edges and surfaces finishes gives up to 16 different types among floors and coatings, outfitted with decors and special pieces.

Decors, as it is expected from Abk, represent one of the collection's distinctive elements: numerous and original, both for floor and coating; they add value to the environment dynamically and with charm, giving space to a high number of new and creative solutions, enlarging collection's versatility.

FORM

Il cemento è una materia creata dall'uomo per l'uomo. Nasce in cantiere, un luogo brulicante di operosità e industriosità. E proprio in questi concetti risiede il fascino che permea le forme di questo materiale e lo accompagna anche nelle sue applicazioni più nuove e contemporanee.

Cement is a matter made by man for man. It arises from yards, places swarming activity and industriousness. It is on this concepts that is based the charm that permeates this matter and follows it even in the newest and most contemporary applications.

LA GARANZIA DI UN FUTURO GREEN BUILDING PASSA ATTRAVERSO LA QUALITA' ECO-SOSTENIBILE.

Da azienda sensibile alle tematiche ambientali, ABK si è sempre preoccupata di mantenere i parametri che regolano i processi industriali al di sotto delle normative, composto al 40% minimo da materiale riciclato recuperato da altre lavorazioni industriali. ECO-BODY è ufficialmente certificato per recepire gli standard LEED (Leadership in Energy and Environmental Design) il sistema di rating internazionale delle performance ambientali che in edilizia promuove la progettazione sostenibile riguardante l'intero edificio per ridurre l'impatto ambientale per tutto il suo ciclo di vita. Tutte le collezioni ABK che utilizzano questo speciale impasto certificato, riportano nella pagina riepilogativa l'esclusivo logo ECO-BODY, che oltre ad indicare il 40% minimo di materiale riciclato, ne evidenziano la compatibilità col sistema di crediti LEED.

ABK è membro di GREEN BUILDING COUNCIL ITALIA, l'associazione italiana dei leader che operano per trasformare il mercato dell'edilizia verso la sostenibilità ambientale e per costruire comunità vivibili. I soci GBC Italia promuovono la responsabilità ambientale, economica e sociale innovando il modo in cui gli edifici sono progettati, realizzati e utilizzati.

THE FUTURE OF GREEN BUILDING IS GUARANTEED BY ECO-SUSTAINABLE QUALITY.

As a company that cares deeply about environmental issues, ABK has always endeavoured to keep its parameters below the legal limits for manufacturing processes, utilising a minimum of 40% recycled material recovered from other industrial processes. ECO-BODY is officially certified for access to LEED (Leadership in Energy and Environmental Design) credits, the international rating system for environmental performance which promotes sustainable design in the construction industry with a view to reducing the overall environmental impact of buildings over their entire life cycle.

All ABK collections made with this special certified mix are identified in the contents page with the exclusive ECO-BODY logo, which in addition to indicating a minimum of 40% recycled material, underlines the product's compatibility with the LEED credits system. ABK is a member of Italian GREEN BUILDING COUNCIL, the association of top players working to transform the building market towards sustainability and to build liveable communities. GBC Italian members promote environmental, economic and social responsibility, innovating buildings in terms of engineering, design, manufacturing and use.

The system is based on credits awarded for each of the sustainability requirements met by the building. The sum of the credits determines the level of certification obtained. Although LEED certification is awarded to buildings and not single products, ceramic tile products contribute to the achievement of LEED credits.
