Natural R10 / A+B

La tecnologia Natural R10 porta il grado di finitura a un nuovo livello: all'alto coefficiente di attrito si aggiunge la morbidezza e praticità della superficie liscia. Proprietà fondamentali come la capacità antiscivolo, la resistenza all'usura e agli agenti atmosferici si combinano a caratteristiche estetiche tipiche dell'interior design più sofisticato. Con questa doppia anima, la finitura regala una spinta progettuale inedita ai pavimenti in gres porcellanato, assicurando performance antiscivolo e semplicità di gestione della superficie: oggi, più che mai, in perfetta sintonia e corrispondenza con le esigenze per gli spazi coperti di ogni genere.

Natural R10 / A+B

It's the technology behind the Natural R10 range that brings the quality of the finish to a whole new level: silky and smooth but also anti-slip, due to a higher coefficient of friction in the surface finish, also resistant to decay and damage from the atmosphere. These fundamental properties - both material and aesthetic give the tile a 'double soul' - where today's most forward-thinking interior design styles are underwritten with total performance. Easy to maintain, effortless to use in design, Natural R10 demonstrates how today, more than ever, our finishes are in tune with the whole range of demands placed on them in any space.
