SANT'AGOSTINO

SET

I linguaggi contemporanei, non solo del progetto ma della stessa vita quotidiana, sono sempre più fluidi, nei valori estetici, sociali, economici. E nulla è più eclettico della materia ceramica evoluta, che sembra giocare liberamente - in un' alchimia di sintesi fra derivazioni, incroci e composizioni - con le altre materie: studiandole, interpretandole e plasmandole per renderle più adatte ad ogni esigenza del costruire e dell'abitare contemporanei.
SET è una vera e propria fusione di materiali diversi - cemento: SET CONCRETE; cemento-tessuto: SET DRESS e SET TARTAN; cemento con marmo: SET GEM; vernice: SET WALL; legno: METROWOOD; decorazione: METROSIGNS - che si incrociano fino ad unirsi l'uno con l'altro per dare vita a piccoli capolavori ceramici.

The contemporary languages, not only of the project but the same everyday life, are increasingly fluid, in the aesthetic values, social, economic. Nothing is more eclectic than the evolved ceramic matter, which seems to play free - in an alchemy of synthesis between derivations, intersections and compositions - with other materials: by studying, interpreting and shaping to make them more suitable for all the requirements of contemporary building and living.
SET is a true fusion of different materials - cement: SET CONCRETE; cement-fabric: SET DRESS and SET TARTAN; cement with marble: SET GEM; paint: SET WALL; wood: METROWOOD; decoration: METROSIGNS - that intersect to join up one to the other and give life to small ceramic masterpieces.

*** AVVERTENZE PER LA POSA SOPRAELEVATA**
Il formato 60x90 in 20 mm di spessore è ritenuto idoneo per la posa su massetto, su ghiaia, su sabbia, su erba, o su supporti ad una altezza massima di 2 cm utilizzando 6 supporti per lastra in modo da distribuire uniformemente i carichi. Per una sopraelevazione compresa tra i 2 ed i 10 cm è necessaria l'applicazione di una rete in fibra di vetro nella parte inferiore della lastra (foglio di acciaio zincato o rete plus per il formato 60x90). Una sopraelevazione superiore ai 10 cm è vincolata alla applicazione alla parte retrostante della lastra di un foglio di lamiera zincata.

*** WARNINGS FOR RAISED FLOOR LAYING**
Size 60x90 in 20 mm thickness is considered suitable for laying on screed, gravel, sand, grass or supports at a maximum height of 2 cm, using 6 supports per slab in order to distribute loads uniformly. For raised laying between 2 and 10 cm you must apply a fibre glass mesh to the rear of the slab (galvanised steel sheet or plus mesh for size 60x90). For raised floors of more than 10 cm, galvanised steel sheet must be applied to the rear of the slab.

*** HINWEISE FÜR DIE INSTALLATION ALS DOPPELBODEN**
Das Format 60x90 in 20 mm Stärke ist sich für die Verlegung auf Estrich, Kies, Sand, Gras oder Trägern mit einer maximalen Höhe von 2 cm, indem man 6 Stützen pro Platte verwendet, um die Lasten gleichmäßig zu verteilen. Für eine Surélévation comprise entre 2 et 10 cm, il est nécessaire d'appliquer un filet en fibre de verre au dos de la plaque (feuille d'acier galvanisé ou filet « plus » pour le format de 60x90). Une surélévation de plus de 10 cm exige l'application d'une feuille de tôle galvanisée au dos de la plaque.

*** MISES EN GARDE POUR LA POSE SURÉLEVÉE**
Le format 60x90 en 20 mm d'épaisseur est approprié à la pose sur chape, gravier, sable, pelouse ou sur vérins à une hauteur maximum de 2 cm, en utilisant 6 vérins par plaque, de manière à répartir équitablement les charges. Pour une surélévation comprise entre 2 et 10 cm, il est nécessaire d'appliquer un filet en fibre de verre au dos de la plaque (feuille d'acier galvanisé ou filet « plus » pour le format 60x90). Une surélévation de plus de 10 cm exige l'application d'une feuille de tôle galvanisée au dos de la plaque.

*** РЕКОМЕНДАЦИИ ПО УКЛАДКЕ ПЛИТ НА ФАЛЬШПОЛ**
Форматы плит 60x90 толщиной 20 мм считаются пригодными для укладки на стяжку, гравий, песок, траву или на основания высотой не более 2 см при использовании 6 стоек для каждой плиты для равномерного распределения нагрузок. Для поднятия уровня пола на высоту от 2 до 10 см необходимо прикреплять к нижней стороне плит сетку из стекловолокна (лист оцинкованной стали или сетку plus для формата 60x90). При поднятии уровня пола на высоту более 10 см обязательно следует крепить к нижней стороне плит лист из оцинкованной стали.
